HEALTH REPORT by Dale

I now have so many health issues that it is difficult for me to find anything new to talk to you about. I did go to the eye doctor the other day and he said that my eyes are getting worse and that was probably due to my diabetes. The doctor proceeded to put some chemicals in my eyes to check them for various diseases, and I thought for sure I was going to go blind from the stuff he put into my eyes. After the exam Gilda and I neither one could see well enough to drive, so I asked the doc if he could put something else in my eyes to get rid of the stuff that he had used. They then poured some more chemicals into my burning eyes, and I could see well enough to stagger outside and find our car. I was finally able to drive out of the parking lot after I put a strip of dark plastic over my eyes along with my shade glasses. It was hours before I could see as well as I did before going to the doctor. By the way, I can still read books and see well enough without even using glasses. I think maybe the eye doc just schedules me every year to make money doing strange things to my eyes to make me believe he is helping my vision. After the check-up they tried to sell me expensive glasses that I did not need. For your information, I can go to the dollar store and try on different strength glasses and find one that works just fine.

I am considering not going to the eye doctor, dentist, medical doctors or anyone else unless something is just not working properly. As the old saying goes, "If it ain't broke, don't fix it." It may just be me, but what the various medical experts call "preventive medicine" may actually be "causing medicine" because they seem to cause me more problems than they are preventing or correcting. Just thought I ought to warn you because you may be experiencing some of the same things. Thanks for your prayers. I am feeling good, I am alive and rejoicing at this moment in time.
