## HEALTH REPORT by Dale

March 2009

I have some good news and bad news: I am doing fairly well for the that condition I am in. The bad news is that after returning from my January mission trip to Cuba I had to double my diabetic medication. It seems the food in Cuba is not all that good for someone with diabetes. Also, my local doctor of almost 25 years is leaving. My health files look like an unabridged dictionary and my doctor told me I was one of the most difficult patients he had ever had. I think he is leaving because he does not want to be responsible any longer for my health issues. How will I ever find another doctor willing to take me on with all my case files?
